Phone: +386 31 792 160

Introduction

Through my dedication to creating innovative software solutions, I have become an experienced developer. I know the computer as it has been actively involved in my life for the past 15 years.

Django - Solidity - Web, Web3 & Company

7 years of professional experience, gave me a strong foundation in Python, Blockchain and other technologies. I can handle independent work. I feel effective communication in collaborative environments makes it more enjoyable to tackle complex problems.

Education

- **High School Graduate, Computer Technician**
ŠCNM - SEŠTG, SSI za poklic tehnik računalništva
- **Professional study programme, Computer and Information Science**
FRI UL, diplomirani inženir računalništva in informatike (VS)

Professional Experience

- **Software Developer/Engineer**, [2015] - [2020], Geton d.o.o.
I contributed to the development, setup and scaling of the company's system/software, and participated in high-level decision making. I worked across all system levels. During this time, I developed solidity smart contracts, full-stack Django applications, as well as server management and application deployment.
- **Software Developer**, [2018] - [2021], Grossus d.o.o.
During my work for Grossus, I significantly contributed to the development team. As one of two lead programmers, I focused on translating business ideas into software designs and solutions. My technology stack during this time was Solidity, Django & server management (DevOps).
- **Lead Software BE, CI/CD, Developer/Engineer**, [2021] - [2024], [HazelLabs d.o.o.](#)
Provided technical leadership and advice on computer devices and programs for projects. I especially focused on the Blockchain Platform Qvrse (Solidity, Backend and DevOps).

Projects

- **Vigil - Digitalization of Firefighting**, vigil.si
Platform for managing fire station units. As it outgrew its MVP state, I decided to enhance it for production by scaling it and performing a complete database overhaul. The project was later entrusted to me.
Try it out: admin@enota.si ; password: gasilec123
- **QVRSE - NFT branding and loyalty programs**, qvrse.io
From ideas to implementation, including smart contracts, backend, full DevOps and other needs.
- **WH2C - Platform White Hydrogen Coalition**, app.whiteh2coin.com
Full-stack from zero development including Solidity, Python, Django, web and web3 technologies, to deployment with maintenance.
[2019] - [2020].
- **API for Consumers of Electricity Exceeding 1 Mega Watt Hour**, *M2M*: elektroapi.hrastar.si
A swift solution for Slovenian companies due to legal requirements. Features simple data entry and data retrieval for the enforcers.

Skills

- **Blockchain Development:** Truffle, Hardhat, Remix, MetaMask, Web3py, web3js
- **Programming Languages:** Python, Solidity, among others
- **Web Technologies**
- **Database:** Proficient with SQL, experience with other databases
- **Problem-Solving:** Strong analytical and debugging skills
- **Other:** Comprehensive knowledge in apps, programming languages, operating systems, frameworks, technologies, and tools
